810 E Denny Way, Seattle, WA, 98122

full stack web developer

Portfolio: www.austinimperial.com
GitHub: [www.github.com/austinimperial](https://github.com/austinimperial)
LinkedIn: linkedin.com/in/austinimperial

Objective: I am seeking an entry-level full stack or front end position

< Skills />

JavaScript

- // Strong knowledge of JavaScript (ES6), HTML5, CSS3
- // Ability to write clean asynchronous code
- // Experience designing and developing REST API's
- // Advanced knowledge of OOP & functional design patterns

React, Node, Express, MongoDB

- // Ability to design and build complex, full stack applications from the ground up
- // Up to date on the latest & greatest React design patterns
- // Experience integrating public REST API's
- // Designs with performance optimization as well as component reusability in mind
- // Can write both class components and functional components + Hooks

UI/UX

- // Ability to design and build beautiful, high performance user interfaces
- // Keen eye for good design

< Education />

Indiana University, Bloomington, IN BA, Cognitive Science, focus in Computer Science (December 2017)

- // Python for agent-based modeling & creative projects
- // Vanilla JS, HTML, CSS, and Node

Web Development (June 2019 – Present)

- // Self taught, special thanks to Mosh Hamedani, Reed Barger, and Traversy Media

< PastWork />

Cherry Street Coffee House barista (Feb 2019 - Present)
Vigilant Eats dry-blending tech (Jan 2018 – August 2018)
Cardinal Spirits bar tender (March 2017 – May 2018)
Soma Coffeehouse barista (Jul 2016 – March 2017)
